The Company reserves the right to amend and improve its products without notice.

Functioning

- 1) The profile is clamped at low pressure;
 - 2) By pushing simultaneously the pneumatic buttons placed on the handles of the right and left levers, the high pressure clamping is activated and the mist sprayer and vertical motor are set in motion; The bimanual control device is certified and complies with the safety regulations in force.
- The motor is equipped with a thermic feeler that stops the feeding in case of overheating, protecting the integrity of the motor itself.

Start button of the pneumatic 4-diameter copy pin: 5-6-8-10

Revoler with 4 stop devices of the vertical descent (revoler with 8 stops is optional)

6+6 foldaway stop devices on the lateral supports in 3 available lengths (1/2/2,5m)
